You can easily open the crack file to download the patch.. SDL Trados Studio 2011 Professional SP2 (Full Activator Extr).Combined tumor necrosis factor-alpha and transforming growth factor-beta increases the angiogenic potential of cultured rat aortic smooth muscle cells. We showed previously that aortic smooth muscle cells (SMCs) obtained from atheromatous lesions induce angiogenesis in a chick chorioallantoic membrane (CAM) assay. Here we show that aortic SMCs in culture produce significantly more of the angiogenesis-promoting cytokine, transforming growth factor-beta 1 (TGF-beta 1), than do normal aortic SMCs in the absence of exogenous cytokine stimulation. In addition, the SMCs express the angiogenesis-promoting membrane ligands endoglin, TGF-beta receptor III, and the vascular endothelial growth factor receptor Flk-1 (fms-related tyrosine kinase-1). To determine if the effects of TGF-beta on angiogenesis could be augmented by other proinflammatory cytokines, we studied the effects of combined stimulation on TGF-beta and on angiogenesis. Compared with TGF-beta stimulation alone, combination

of TGF-beta with tumor necrosis factor-alpha (TNF-alpha) significantly increased the synthesis of TGF-beta by SMCs. Compared with TGF-beta alone, combined TGF-beta and TNF-alpha stimulation resulted in significantly greater
